

NEW FEATURES ADDED TO DOMAIN WEB

EFFECTIVE OCTOBER 15, 2014

■ **Save your credit card information for future use**

Customers can select an option to save their credit card information when creating an account **or** when updating their account information under the My Information tab. This information is stored with a secure service and pre-populates the payment screen with the stored information.

■ **Use credits to purchase documents and name searches**

Previously, credits could be used to conduct name searches, but not to purchase documents. Monthly billing subscribers will continue to be invoiced for purchased documents and will not be able to apply credits to their account. (To unsubscribe from monthly billing, go to the "My Account" tab and change your account type to "Pay As You Go.")

■ **Pay online (for customers with monthly billing accounts)**

Monthly billing subscribers now have the option to pay their invoice online using a Visa or MasterCard. Instructions (including a URL address for web payments) will be included with the monthly invoice.

■ **View half page for free**

Customers may view without charge a half page preview of any of the pages in a document that is available for purchase. (NOTE: While you may preview individual pages, you may not purchase individual pages. Only entire documents are available for purchase.)
